75C. Some states in the U.S. have "informed consent" laws concerning abortion. These laws require that, before a woman has an abortion procedure, her physician must provide her with certain information such as details on the stages of foetal development including an ultrasound scan, the possible complications and side effects following an abortion, and alternatives to abortion. Do you support or oppose similar laws in Canada for women considering abortion?

119C. In the past two years there have been three cases in Canada where pregnant women have been murdered. Currently in Canada, the Criminal Code does not recognize a fetus as a human being, so someone who injures or kills an unborn child during an attack on the mother cannot be charged with two crimes. Would you support or oppose legislation making it a separate crime to injure or kill a fetus during an attack on the mother?
